

Science with and for Society – Project Partner Search Form CALL:

Science with and for Society 2020 (SC1-BHC-29-2020)

- I offer my expertise to participate as a Partner in a Project
- I am planning to coordinate a project and I am looking for Project Partners

Topics

Strategic orientation 1. Accelerating and catalyzing processes of institutional change

(Innovative actions for improving urban health and wellbeing - addressing environment, climate and socioeconomic factors)

- SwafS-01-2018-2019-2020: Open schooling and collaboration on science education
- SwafS-08-2019: Research innovation needs & skills training in PhD programmes
- SwafS-23-2020: Grounding RRI in society with a focus on citizen science
- SwafS-24-2020: Science education outside the classroom**

Strategic orientation 2. Stepping up support in Research & Innovation policy

- SwafS-09-2018-2019-2020: Supporting research organizations to implement gender equality plans
- SwafS-25-2020: Gender-based violence including sexual harassment in research organisations and universities
- SwafS-26-2020: Innovators of the future: - Strengthen the legal framework on environmental health in Albanian through harmonization with European requirements; Update and strengthen the infrastructure and civil service in Environmental Health in appropriate governmental departments in collaboration with authoritative international Institutions;

Strategic orientation 3. Building the territorial dimension of SwafS partnerships

- SwafS-14-2018-2019-2020: Supporting the development of territorial Responsible Research and Innovation: - Put in place a national and local organization for preparing, planning and responding to health protection concerns and emergencies, including man-made disasters and the future impact of climate change (i.e.heat waves, cold weather, fires, floods, epidemics, landslides);

Promote ability to prevent, plan for and manage complex public health disasters, by adopting a cross-disciplinary approach; Implement an integrated approach in understanding, forecasting and managing the above mentioned events, the impacts of which will be surely more and more relevant in terms of environmental-health impact and social economical cost; Update and strengthen training for civil service in Environmental Health at national and local level; Provide elements to share understanding, awareness, and empowerment on environmental-health issues at individual and collective level;

Strategic orientation 4. Exploring and supporting citizen science

SwafS-27-2020: Hands-on citizen science and frugal innovation - Provide a long-lasting curriculum for environmental health training, which also includes the field of environmental health emergencies response; Strengthen inter-sectoral cooperation which contributes to the strengthening of environmental health system;

SwafS-28-2020: The ethics of organoids

SwafS-29-2020: The ethics of technologies with high socio-economic impact

SwafS-30-2020: Responsible Open Science: an ethics and integrity perspective

Strategic orientation 5. Building the knowledge base for SwafS SwafS-19-2018-2019-2020:

Taking stock and re-examining the role of science communication

SwafS-31-2020: Bottom-up approach to build SwafS knowledge base

1) PROJECT INFORMATION

Field of expertise related to the topic: To promote effective environmental health system and to improve environmental health-related conditions for the benefit of the population of Albania

Potential contribution to the project: Implementation (including M&E); research; trainings; human resources.

Role in the project:

Researcher **Training**

Already experience as a Coordinator: No
As a Partner: Yes

.....

TARGET COORDINATOR / PARTNER SOUGHT

Higher education / university
Research institution

We are looking for following Expertise / Competencies: We are looking for one or more university or research institution(s) with experience in EU-funded project administration and coordination

Short profile of the Organization:

The mission of the PHI, as a National Center for Public Health, consists of developing and applying prevention and control of diseases, injuries, disabilities, and environmental health damaging factors, and developing and applying health promotion, in close cooperation with national and international agencies / bodies / organizations.

In more detail, the mission of the PHI is:

Monitoring the health status of the population in order to timely identify and scientifically solve the health problems encountered. Identification and monitoring of health risk determinants. Undertake and increase the level of information, education and awareness of the population on health problems. Stimulate, coordinate, and support institutions and community initiatives regarding activities undertaken by them to identify and resolve health problems. Stimulate and support draft laws and regulations aimed at protecting the health of the population and its health insurance. Continuous training and education of public health workers and professional support to them. Assess the effectiveness, accessibility, and quality of both population-based and patient-based health services. Research to provide innovative solutions to health problems as well as to establish effective strategies for disease control and prevention.

Date: 17 September 2019

The offer is valid until: March 2020
