We are looking for following Expertise / Competencies: For the H2020 call we are looking for a strong consortium that is interested in developing a citizen science approach building on our campaign “National Park Garden”. This campaign focuses on mobilizing citizens to perform biodiversity friendly gardening. Participants can nominate their gardens to become part of the “National Park Garden” and upload pictures and comments (see: <https://www.global2000.at/nationalparkgarten>). By now about 1000 garden owners have registered and 1.640.000 m² of private gardens have been nominated for the “National Park Garden”. Building on this strong user base we would like to further develop the National Park Garden concept using citizen science approaches e.g. for biodiversity assessments or to foster and develop biodiversity friendly gardening methods in and with the community of garden owners. We are also very much interested in upscaling our approach to an European level and can also build on the support of our partner NGOs in the Friends of the Earth network for that.

We are not interested in leading a consortium but very much willing to take a strong role in the application as well as in the implementation phase.
